

AMENDMENT

In The Claims

*E1*  
Please amend claims 14, 18, 19 and 20:

14. A cytomodulating conjugate for administration to a mammalian host, said conjugate consisting essentially of folate joined to a selective moiety, wherein said selective moiety consists essentially of an antigen to which the host has been previously sensitized or to which the host has natural immunity.

*E2*  
18. The conjugate of Claim 14, wherein said selective moiety comprises an antigen selected from the group consisting of an oligosaccharide A antigen, an oligosaccharide B antigen, a vaccine antigen, and fluorescein isothiocyanate (FITC).

*E2*  
19. A cytomodulating conjugate consisting essentially of folate joined to a selective moiety, wherein said selective moiety consists essentially of an epitope selected from the group consisting of  $\alpha$ -galactosyl, a blood group antigen, a xenoantigen, HIV, a vaccine antigen, a minor histocompatibility antigen, and fluorescein isothiocyanate (FITC).

20. A conjugate consisting essentially of folate covalently joined to fluorescein isothiocyanate (FITC).

*E3*  
Please add new claim 21 and 22:

21. The conjugate of Claim 14 wherein said selective moiety consists essentially of fluorescein isothiocyanate (FITC).

*E3*  
22. The conjugate of Claim 19 wherein said selective moiety consists essentially of fluorescein isothiocyanate (FITC).

REMARKS

Claims 14-22 are pending. Claim 18 has been withdrawn from consideration by the Examiner in the absence of an allowable linking claim. Claims 14, 18, 19 and 20 have been
